Response to Arguments

Applicant's arguments, see the response filed September 12, 2003,, with respect to claims 1-41 have been fully considered and are persuasive. The rejection of all pending claims has been withdrawn.

Allowable Subject Matter

Claims 1, 3-4, 7-17, 19-27, 30, and 33-41 are allowed.

The following is an examiner's statement of reasons for allowance:

Examiner agrees with the arguments presented by the Applicant presented in the response to the first Office action. The prior art, especially Smith et al., fails to teach or suggest an electrospray device for use in a mass spectrometer which has an electrode with a surface exposed to the fluid to be delivered to a mass spectrometer where the electrode is removably secured to a cap spaced apart from the electrode as recited in claims 1, 30, and 33. Claims 3-4, 7-17, 19-27, and 34-41 are allowable by virtue of their dependency.

While the claim language "removably secured" is typically held to be an obvious modification, in the instant case the Examiner has relied on the specification taken in light of the prior art to determine that in the prior art, there is no teaching or suggestion to make an electrode having a surface exposed to the fluid to be electrosprayed removable (See specification page 26) where this limitation implicitly provides for the alteration of the flow geometry within the electrospray and the electrode surface area presented to the fluid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
